

Cover Overview 2024 Basisverzekering Restitutie

This overview shows the reimbursements of the Basisverzekering Restitutie. The following reimbursements apply per person per calendar year, unless otherwise stated. With the Basisverzekering Restitutie the maximum reimbursement is the statutory amount or the standard rate (in line with the market) in the Netherlands.

This overview of reimbursements is intended to easily see what types of reimbursements are included in a particular policy. The overview gives a general description of the care to which you are entitled. No rights can be derived from this overview. The policy conditions may contain further terms and conditions relating to coverage.

For a complete overview, please read the policy conditions carefully. These are always final. Do you have any questions? Please call us at 088 - 35 35 763. We are happy to help you.

| Type of Care | Basisverzekering Restitutie |
